

TCEQ VISIT

(Texas Commission on Environmental Quality TCEQ)

Remember the administration of Bob Atwood, President, “someone” announced at a board meeting that they had a permit from TCEQ to cut into the third lake dam with a bull dozer and install a fishing pier. I sent an Email to TCEQ for a copy of this permit. By the way TCEQ did not issue a permit to cut into the face of the third dam! TCEQ came calling on HAWL.

The result is a very expensive fishing pier with Engineering Costs, Special Bricks, Labor, and Inspections to re-establish the integrity of the third dam.

They always blame someone of “TURNING THEM IN,” not the persons responsible for the violations. Kill the messenger, it makes all the guilty feel better and the members of HAWL have to PAY.
